Nutrien
Livestock™

Auction Selling Agents:

Nutrien Stud Stock with Nutrien Wilson Russ Warren.

A 5% rebate is offered to outside agents who attend the sale and introduce new buyers by 9am on auction day and settle on their behalf within 7 days of purchase. A 1% rebate is offered to agents who attend the sale and settle an auction ram purchase invoice on behalf of a client within 7 days of sale.

Animal Health Statement:

- All shed rams were shorn 1st March and paddock rams were shorn 17th March.
 - All rams were treated with 7-in-1 Glanery vaccination and extinosad when shorn.
 - All rams were crutched, Klik'd and drenched 20th August
 - HR is accredited brucellosis-free (Certification: 76526, accreditation: OB-TR), and Ojd flock status: MN3 (Certification: NS76233)
 - Rams were micron-tested July 15th at 14 months of age.
-

*Haddon Rig Pty Ltd retains the right to collect up to 800 semen doses
from any sire sold at our own expense and for internal use only*

Welcome

Welcome to Haddon Rig's 2025 On-Property Auction. 2025 is an exciting year to be in Merinos with record prices for lamb offering rewarding returns for breeders. With 1800 ram lambs classed in January, we're excited to present this year's auction group and grade selections. Shedded rams averaged 105kgs at the start of August and paddock rams averaged 90kgs.

Our stud focus is to continue breeding easy-care merinos, without sacrificing wool cut and the quality HR is known for. Proof of this was a comparison of 2000 HR-bred wethers which cut an average of 4.5kg as lambs, against 2000 trade wethers which cut 3kgs at the same age. This equates a difference of \$15/hd return or \$30,000 across the whole trade.

From a genetic perspective, we're enhancing our data collection process, including eye muscle and fat scanning our poll stud ewes in December this year, which will increase the accuracy of our carcass traits (YEMD and YFAT). We're also collecting more reproduction data at scanning and lamb marking to more accurately reflect our ewe rearing ability. This data will allow us to make more informed breeding decisions when matching ewes to sires at joining and accelerate our breeding vision. We look forward to sharing our future genetic progress with you.

We want to thank all clients, new and existing for your continued support. As always, the best part of our job is seeing the success of your businesses and we really appreciate the opportunity to be part of your business' growth.

Kind regards,

Liv Falkiner and Matt Kelly

The following are based on the 2025 Auction Group averages:

WOOL

As expected, HR continues to vastly outperform the industry for both Yearling Clean Fleece Weight (YCFW) and Adult Clean Fleece Weight (ACFW), reflecting the ability of HR stud to cut large amounts of wool both early on (as yearlings) and throughout their lifetimes (as adults).

EARLY-MATURITY

Superior growth rates reflect the ability of the HR stud progeny to get to weight quickly, both when they are weaned to when they are 1 year old. Lambs from these rams will reach heavier weights at younger ages, enabling them to be marketed sooner (at the same weight) or be marketed at heavier weights (at the same age) compared with low growth lambs.

WELFARE

As we continue to finetune our ASBVs and improve our accuracies, a core focus continues to be improving the fly strike resistance scores of the sheep. At the same time, we're carefully increasing the selection pressure on condition scores (Yearling Eye Muscle Depth and Yearling Fat) to improve whole body energy and drought resilience without losing the wool type and correctness our sheep are known for.

UNDERSTANDING AUSTRALIAN SHEEP BREEDING VALUES (ASBVs)

(Sheepgenetics.org)

An Australian Sheep Breeding Value (ASBV) is an estimate of the genetic potential a sheep will pass on to its progeny. ASBVs are designed to be used in conjunction with visual selection methods to select sheep that match your breeding objectives.

Yearling Fibre Diameter (YFD):

Fibre diameter ASBVs are quoted in microns and are expressed as the deviation from the average of animals in the database. The more negative the number the finer the animal. An ASBV of -1.6 means the animal will produce wool that is 1.6 micron finer than the average. A ram with an ASBV for FD of -1.6 will pass half of this benefit onto his lambs, that is -0.8.

Yearling Clean Fleece Weight (YCFW):

A positive Fleece Weight ASBV means a genetically heavier cutting animal. Fleece weight ASBVs are quoted in percentages. ASBVs are deviations from the average of the animals in the database. An ASBV of 20% means the animal will cut 20% more wool than the average. A ram with an ASBV of +20% will pass half of this benefit onto his lambs, that is +10%.

Post Weaning Weight (PWT):

Weights are measured in kilograms and ASBVs are quoted in kilograms. ASBVs are deviations from the average of animals in the database. So an animal with a PWT ASBV of +6kg will be genetically 6kg heavier at post weaning weight than the average. A ram with a PWT ASBV of +6kg will pass half of this benefit onto his lambs, that is +3kg.

Yearling Weight (YWT):

Weights are measured in kilograms and ASBVs are quoted in kilograms. ASBVs are deviations from the average of animals in the database. So an animal with a YWT ASBV of +6kg will pass half of this benefit onto his lambs, that is +3kg.

Yearling Eye Muscle Depth (YEMD):

Muscling ASBVs are measured and quoted in millimetres. They are deviations from the average of animals in the database. So an animal with an EMD of +1.2 will genetically have an eye muscle 1.2mm deeper than the average. A ram with an ASBV of +1.2mm for EMD will pass half of this benefit onto his lamb, that is +0.6mm.

Yearling Fat (YFAT):

Fatness ASBVs are measured and quoted in millimetres. They are deviations from the average of animals in the database. An animal with a FAT of +0.6 will genetically have 0.6mm more subcutaneous fat than the average. A ram with an ASBV of +0.6 for FAT will pass half of this benefit onto his lambs, that is +0.3mm.

INDEXES

An index ranks animals for their suitability to a particular production or breeding objective. It is created by combining multiple individual traits together, in relation to their relative economic contribution.

Wool Production (WP):

The Wool Production index is based on a production system with a strong focus on wool production and quality. The index focuses on genetic improvement of fleece weight, fibre diameter, staple strength and reproduction. Emphasis on lower wrinkle is also included. Selection on the WP index will increase your flock's reproductive performance and reduce breech wrinkle. This is particularly beneficial in flocks looking to produce more lambs and more kilograms of fleece per animal.

Sustainable Merino (SM)

The Sustainable Merino index is based on a production system where the income from sheep meat production and wool clip are reasonably balanced. The index focuses on genetic improvement of fleece weight, growth, lean meat yield and reproduction. Emphasis on reduced wrinkle, dag and worm egg count is also included. This is particularly beneficial in flocks operating in high rainfall areas, or with a strong focus on improving welfare traits, whilst producing large volumes of lamb and wool.

Merino Sire Reference 2025 Auction Team

Special Stud: Top 8% of HR sires naturally joined to best ewes

Double Stud: Top 30 % of HR paddock sires (high % of debutant sires)

Stud (Maiden): Stud sires joined to maiden ewes

Stud (twin): Progeny of joining is a twin

HR 220109 x HR150029

AI sire, breeding rams with soft, low microning, heavy cutting, nourished wools
Reserve champion Medium wool Merino Ram Dubbo 2023

FD	SD	CV	CF
18.3	2.5	13.8	99.8

HR211283 x W170470

Top Price Ram in 2022 (\$24,000) purchased by Bonanza Merino stud
Soft and pure AI sire that consistently breeds seedstock and top selling auction rams

FD	SD	CV	CF
19.6	3.1	15.8	99.7

W220310 x W200231

AI sire chosen for his dual-purpose qualities
Sired the first 2 auction horns (lots 5 & 6)
Reserve champion all purpose class (meat and wool) at Bendigo 2023

FD	SD	CV	CF
17.8	2.6	16.1	99.8

Poll Merino Sire Reference

2025 Auction Team

MP20G0388 x MP18NE73011 (ET bred)

A saleyard carcase with bright quality wool and has the biggest progeny
Sons have the highest PWT and YWT of the catalogue

FD	SD	CV	CF
19.3	3.2	16.5	99.6

PB211136 x MP190008

Semen sire with a heavy cutting medium wool
Best Wool Production average (170wp) for his auction sons
Grand Champion March shorn ram Adelaide 2023

FD	SD	CV	CF
20.4	2.8	13.9	99.6

PB190678 x Wil 170018

Our safest sire, consistently producing excellent progeny with any ewe
He has produced 105 sons for auction to date (17 in sale)
ASBV's indicate his auction sons have positive YEMD with average YCFW of 25
Purchased in 2020 for \$65,000 from Poll Boonoke

FD	SD	CV	CF
21	2.9	13.7	99.8 (3.5 years)

PB200780 x WR 160546

Supreme Australian Merino 2022
Sirey outlook with a true medium wool with extra staple length
Sons have the highest YCFW average in the HR catalogue

FD	SD	CV	CF
20.2	3	14.9	99.8

HR 220355 (ET) x W200780

AI and naturally joined sire, breeding sons with a higher-than-average YFAT
Reserve champion Medium wool Poll Ram Dubbo 2023
Full ET brother sold to Morundie Poll for top price of \$10,000

FD	SD	CV	CF
19.8	2.7	13.8	99.8
